

Rajvardhan Dixit

SAP ABAP on HANA Technical Consultant | Accenture PLC. IN |

Experienced SAP ABAP on HANA technical Consultant with more than 4.5 years of hands-on expertise in developing, and implementing ABAP-based solutions across various SAP modules. An Achievement-driven professional, targeting challenging assignments in SAP ABAP Development.

Profile Summary

- Having Good experience with the full life cycle of R/3 implementations, including requirement gathering, technical specification documents, development of objects, providing assistance in SIT, etc. Analyzing the issues and bug fixing.
- Dynamic & self-starter with strong will to win; possess strong interpersonal, communication, analytical & troubleshooting skills

Core Competencies

- ABAP Development
- Project Execution
- Incident Resolution
- Coding, Testing, Debugging
- Function Modules
- Idoc Interfaces
- CDS Views & AMDP

Soft Skills

- Analytical
- Effective Communicator
- Strong Management
- Problem-solving attitude
- Adaptive
- Inquisitive

Technical Skills

- Technology: SAP ABAP, Function Module, Reports, SAP Data Objects, OData, User Exits, Enhancements, BADI Implementation, Adobe Forms
- Agile Methodologies
- CDS Views

Work Experience

Senior Systems Engineer | Infosys Ltd

May.2021-Jan.2024

- Works on AATP implementations for US, European, and South African Markets
- Implemented Parallel Processing of BAPI to trigger IDocs towards the ECC System in less time, this reduced writeback time from 90 minutes to 10 minutes.
- Debugged 150+ issues leading to their timely resolution.
- Collaborated with SD, MM, BTP, and Business teams for key deliverables.
- Appreciated by functional consultants and clients for work efficiency.
- Working basic knowledge with modules like S, PP, MM and EWM.
- Experienced with Agile Framework and Methodologies.

Projects Executed:

1. Sirius Project: May 2021 – Oct 2021

I provided extensive support on all the existing objects in the project and created ALV reports to upload and download customer hierarchy data.

2. Cordarella Project: Jan 2022 – July 2023

Complete implementation projects where all the interfaces are developed to process IDocs from the ECC system and update all the master and transactional data in S4 HANA Systems.

Major Enhancements:

1. Material mismatch and material missing logic due to PS in SO – Delivery Interface
2. Delivery Completion issue – Standard Enhancement – Delivery Interface
3. Product Substitution and Reason for Rejection Logic – Sales Order Interface
4. Mapping Z-fields with It_extension in BAPI_SALESORDER_CREATE – Sales Order Interface
5. Batch Split Logic – Use Standard BAPI to resolve this – Delivery interface

Created a report to sync data between the ECC and S4 system in case of an interface failure, It uses RFC to get data from the ECC system and uses standard BAPI (same as interfaces) to populate data in standard tables.

Provided support in SIT for all the interfaces along with other teammates, also completed minor developments that came after each SIT.

Implemented a CDS with AMDP Class to categorize SO data on the basis of customer so that BOP run happens more efficiently, it reduced the BOP run job time from 70 min to 3 min.

3. U2K2 Project: August,2023 – January 2024

Under the requirement-gathering phase, collaborating with the client to understand their requirements for Indonesia and South African markets.

Working on ALE Configurations and IDOC mapping.

Packaged app development analyst | Accenture PLC IN.

Feb 2024 – Present

Project: ECC support for World's largest Chemical manufacturer

- Part of direct procurement team, so worked on objects related to procure-to-pay cycle.
- Developed ALV reports related to extended-release supplier.
- Worked with TM team, to develop a interface for processing Process Order related Idocs.
- Successfully resolved 150+ incidents related to custom enhancements, Idocs, Job Failure, Reports, OData , Partner profiles, RFCs, BAPIs, CDS and System dumps in P2P objects.
- Implemented BADI (MB_DOCUMENT_UPDTAE) to trigger Outbound Idoc FM to do LT09 in MES system back (Connection is there between MES, Oracles system and SAP, HANA system)
- Updated the codes by replacing BDC Transaction calls with Standard BAPIs
- Header text and other related upgradations in Adobe Form of PO.
- Created a single CDS view using five different standard CDS view and consumed it in Odata service so all the purchasing data of HANA can be consumed by CPI team.
- Created 5 different CDS view, using functions and complex associations for BW reporting.

Education

Vellore Institute of Technology | Vellore

May 2020

B. Tech Computer Science (Specialization in Bioinformatics) | CGPA: 8.5

Sarvepalli Radhakrishnan University | Bhopal

Sep 2016

Diploma in Computer Application | Percentage: 72.29

Certifications & Recognitions

- [SAP Certified Associate – Back-End Developer – ABAP Cloud](#)
- Accenture Skills Star Award FY24 – ACE (Accenture Celebrates Excellence) – Top 5% employees got this in Accenture worldwide.
- Infosys Certified SAP ABAP Professional Consultant – Infosys Lex Platform
- Rise Insta Awards – recognition for valued efforts in EASSAP
