

Satish Chodavarapu

Professional Summary:

- Have **6** years of experience as an **SAP ABAP** developer.
- Worked in Implementation and Roll out projects in **SD, MM, FI**, modules of SAP ECC and SAP S/4 HANA.
- Worked in **Data Dictionary** (Tables, Views, Structures, Data Elements, Domains, Lock Objects and Search Helps, TMG & Events) Objects.
- Working Experience on **Classical**, Interactive reports, **ALV** Reports and **Module pool** Programming.
- Worked on **SAP SCRIPTS, Smart Forms** and **Adobe Forms**.
- Worked on **Enhancements** - User exits, Customer exits, Screen exits, BADIs & Explicit Enhancement.
- Implemented **SAP Notes**.
- Worked on Debug, RFC, Update FM's and knowledge on **OOABAP, ALE/IDOC**.
- Worked on **BDC** Call Transaction, Session Method, FM and Update FM.
- Worked on SLIN, **Runtime Analysis** (SE30), SQL Trace (ST05) .
- Good Experience on **CDS** and **AMDP**.
- Good Experience on **ODATA** services.

Technical Skills:

- **Technical Skills** : C, C++,.
- **Web Technologies** : HTML, CSS.
- **ERP Package** : SAP ECC 6.0
- **S/4 HANA** : 1709, 2109

Professional Experience:

Company Name	Designation	Duration
Capgemini	SAP ABAP Consultant	Nov 2023- Till date
Insight Software	SAP ABAP Consultant	Oct 2022 to Oct 2023
Genpact	SAP ABAP Consultant	Nov 2021 to Oct 2022
TCS	SAP ABAP Consultant	March 2019 to Nov 2021

Academic Details:

- Bachelor of Computer Applications from Adi kavi nannaya University and passed with "66%" in 2017.
- Master of Business Administration (Human Resource), pursuing.

Project Summary:

PROJECT#5:

COMPANY	Capgemini
PROJECT	Cargill
ENVIRONMENT	S4/ HANA
ROLE	SAP ABAP Consultant
PERIOD	Nov 2023 To Till date

Roles and Responsibilities:

- Performed unit testing and system integration testing for ABAP programs
- Enhanced the application with custom reports and interfaces to streamline sales order processing and improve efficiency.
- Complex ABAP programming, testing and debugging functions related to the implementation of SAP modules
- Developed Screen Exits for RF Screens to enable change of pallet /storage bin while performing picking of deliveries/ Transfer orders.
- Developed a CDS for E-Ledger using Virtual Elements concept.
- Execute testing, coordinate UAT and complete documentation related to Unit Test (UT) and Integration Test (ITC) Scripts
- Developed a Conversion Program using BAPI for Vendor Master Upload & Open Purchase Orders (all types).
- Developed user exits, Pre-Exits, Post Exits, BADI as required for enhancements.
- Designed and developed a custom sales order processing application using SAP ABAP.

PROJECT#4:

COMPANY	Insight Software
PROJECT	Next Decade
ENVIRONMENT	S4/ HANA
ROLE	SAP ABAP Consultant
PERIOD	Oct 2022 To Oct 2023

Description: Next Decade is an LNG development company focused on LNG export projects and associated pipelines in Texas. Next Decade intends to develop the largest LNG export solution linking Permian Basin associated gas to the global LNG market, creating value for producers, customers, and stockholders.

- Implemented BAdis, Customer exits & Screen exits for the PO and Sales Order.
- Developed an Odata service to receive the Freight Order Updates and then update them in the corresponding events .
- Developed an Adobe Form to print Delivery/Invoice related information
- Developed an Adobe Form to Print 2D & 1D barcodes of Serial numbers in a Delivery
- Developed a Report program to accept the File Input to create Purchase Requisitions and Orders using BAPIs
- Preparing Technical Design specifications and Unit test documents.
- Code review of Peers, testing, troubleshooting and documentation of the programs.
- Worked on BAPI to create the PO (ME21N) while upload excel sheet and download the input file
- Created Custom table to maintain the variant table
- Worked on MPP to create/change/display the request details.
- Worked on user exit to block the delivery/billing for the sales order in VA01/VA02.
- Worked on all RICEFW objects.
- Designed and developed CDS views, behavior definitions, and service bindings to create scalable and efficient solutions.

PROJECT#3

COMPANY	Genpact
PROJECT	ThyssenKrupp
ENVIRONMENT	SAP S/4 HANA
ROLE	SAP ABAP Consultant
PERIOD	Dec 2021 To Oct 2022

Description: Established in 2002, ThyssenKrupp Elevator (India) installs, maintains and modernizes elevators and escalators in India and Bangladesh. We have a strong presence in various segments, such as residential, office and infrastructure. We are committed to working together to make cities the best places to live.

Roles and Responsibilities:

- Developed an Odata Service to create Material documents using Create Deep Entity method.
- Experience with data consumption and manipulation using OData protocols.
- Implemented a BAdi to stop the creation of delivery and transfer order for Quality hold and Quality Recalled batch materials.
- Developed an Interactive ALV report to update the Normal Shipping Route to Express shipping routes for Purchase orders.
- Created a Module Pool program to enable Users to Add/remove Equipments to a Production Order and Print it.

- Worked closely with functional analysts to ensure that business requirements.
- Developed a Smart Form to display customer address and sales orders.
- Developed a program to send Email of Smart form Output as PDF.
- Worked on billing documents smart forms and scripts on whole SD and EWM area
- Worked on migration of 1909 to 2022 and worked on code remediation after migration to 2022.
- Developed Table Maintenance Generator for custom tables
- Worked on VA01 in SD module for table updation
- Worked on IQ01 BDC to update Material Batch characteristics.
- Worked on MIGO BADI
- Worked on Implicit enhancements.

PROJECT#2

COMPANY	TCS
PROJECT	EPRI
ENVIRONMENT	SAP S/4 HANA
ROLE	SAP ABAP Consultant
PERIOD	Jan 2020 To Nov 2021

Description: The Electric Power Research institute (EPRI). Conducts research and development relating to the generation, delivery and use of electricity for the benefit of the public. An independent Non-profit, organization, EPRI brings together its scientists and engineers as well as experts from academia and industry to help address challenges in electricity, including reliability, efficiency, Health, safety and the environment.

Roles and Responsibilities:

- Created CDS for AR & AP aging Custom and Fixed buckets with options to convert currencies based on user input.
- Developed CDS for Customer Bank Statements
- Developed Validation report to check the documents if they have posted correctly by checking pre-requisites and check conditions maintained in a custom table using new ABAP coding.
- Developed Fiori list report for E-Ledger using CDS as backend with Metadata extension
- Implemented few SAP notes.
- Resolved issues by implementing SAP notes sometimes and when couldn't resolve provided KBAs for understanding of the cause of the issue.
- Created CDS for Fixed Asset with reference to standard one and made it according to user's

requirement.

- Designed Data migration from SAP ECC to S4 HANA using SAP SLT and Data Services

- Played a technical liaison role with functional and business users to generate data mapping and data Validation technical documents.
- Leading the effort of optimizing the loading process of large financials (SAP AR, AP, GL and Recurring) data sets including both transparent and clustered tables from legacy ECC to s/4 HANA,
- Designed and implemented Customer Master Data mapping and reference data implementations in SLT using ABAP include programs.
- Implemented performance filters, source side filtering for migrating large data sets.
- Designed and configured SLT Replication (Real time and Batch) from SAP ECC sources using HANA Data provisioning and BODS.
- Expertise in CMC configuration and administration of SAP Data services repositories.
- Analyzed for data duplication issues and resolved them.
- Created Material Demand and Inventory Projection report to display the stock and demand of materials for up to a year using new ABAP coding.
- Created Smartform to view multiple customers/vendors Accounting document information.
- Create ODATA services for single and mass screens.
- Changes are done in existing Odata service to enable/disable the buttons.

PROJECT#1

COMPANY	TCS
PROJECT	Hershey
ENVIRONMENT	SAP ECC 6.0 /S4/ HANA
ROLE	SAP ABAP Consultant
PERIOD	March 2019 To Dec 2019

Description: The Hershey Company, commonly known as Hershey's, is an American multinational company and one of the largest chocolate manufacturers in the world. It also manufactures baked products, such as cookies and cakes, and sells beverages like milkshakes, and many more that are produced globally.

- Understanding the functional specifications and Preparing the Technical Specifications.
- Developed reports using ALV's.
- Developed Smartforms for VA03 and VF03.
- Interacting with functional team to resolve the issues in the given objects.
- Resolve Performance issues of code using SQL Tracer and Code Inspector.
- Major work involves design, development, testing and documentation of Reports

(ALV), enhancements (user-exits, Customer exits, BADI), Smart forms, BAPIs, Function Modules (Normal and RFC) etc.

- Worked on ALV to display the open sales order details and based on delivery but on create the delivery.
- Worked on customer exit to add the custom tab in PO header/Item.
- Displaying Maintenance details using BAPI Function module.
