

KARNAKAR LUNAVATH

SAP CPI /ABAP-HR Consultant

Email: Karnakarcpi@gmail.com

Mobile:

9493706458,8328113817

Professional Summary:

- Nearing 5+ years of progressive IT experience as an SAP CPI /ABAP-HR Consultant with proven abilities in coding, testing and documentation. SAP Cloud Platform Integration (CPI), spanning multiple functional modules. Proven track record in implementing and supporting complex integration scenarios, including custom-built solutions tailored to unique business requirements. Known for strong problem-solving skills, a proactive approach to learning new technologies, and a consistent commitment to delivering high-quality, reliable integration solutions that meet customer expectations. Recognized for outstanding performance and dedication in fast-paced project environments.

SAP ABAP-HR:

- Efficient usage of HR Logical Databases (PNP and PCH).
- Proficient usage of HR Macros.
- Personnel Administration (PA),
- Organizational Management (OM),
- Time Management (TM),
- Payroll programming (PY).
- Infotypes creation and Enhancement for PA.
- Data Dictionary: Creation and maintenance of tables, structures, views and dictionary objects.
- Modularization techniques: Include, Subroutines, Function modules,
- Reports: Creation of Classical, Interactive and ALV Reports.
- Menu Painter: Development of menu interfaces for various screens and interactive lists.
- Screen Painter: Development of screens for user-defined transactions and writing of associated modules mainly for data entry in user-defined tables.
- Module Pool Programming: Knowledge in Module Pool Programming.
- BDC: Development of Classical Batch Input and Call Transaction programs for uploading data from legacy system to SAP system for various transactions, Inbound & LSMW.

SAP CPI Professional Summary:

- Designed, implemented, and deployed I Flows on SAP CPI Tenant to meet various business integration requirements.
- Utilized **Message Mapping** (including Node Functions) and Content Modifiers for efficient message transformation in Cloud Integration.
- Hands-on experience with a wide range of adapters, including **SFTP, Mail, HTTPS, SOAP, IDoc, OData, SuccessFactors, JMS, and Process Direct** within SAP CPI.
- Worked extensively with integration components such as JSON/XML conversions, Content Modifiers, Request Reply, Multicast Router, Process Calls, Local Integration Processes, Exception Subprocesses, and Encoding.
- Established secure Cloud-to-On-Premise connectivity using **SAP Cloud Connector** in SAP BTP Integration Suite.

- Developed and successfully deployed multiple custom integration flows into the CPI Tenant, meeting complex business requirements.
- Provided L2/L3 production support, resolving CPI interface issues and ensuring minimal downtime.
- Experienced in handling data format conversions: XML to CSV, CSV to XML, JSON to XML, and XML to JSON.
- Managed connection setups between SAP S/4HANA, SAP CPI, SAP BTP, and non-SAP enterprise systems.
- Hands-on experience in **security configuration**: managing encryption/decryption, security artifacts in SAP CPI.
- Built and exposed CPI integration flows as APIs using **SAP API Management**.
- Applied security and control policies such as OAuth 2.0, API Key, and Basic Authentication to protect and manage APIs.
- Involved in daily monitoring of **SAP PO** systems, including queue/message monitoring, and resolving tickets as part of the support team.
- Analyzed and resolved open incident tickets, providing timely and effective resolutions to customers and stakeholders.
- Supported various interfacing scenarios like – XML to IDOC/BAPI/BADI, File to IDOC/RFC, File to Proxy, HTTP to IDOC/BAPI, Proxy to JDBC,
- Maintained communication with upstream/downstream system owners to ensure timely data feeds and issue resolution.
- Experienced in raising and coordinating OSS messages with SAP to resolve critical integration issues.

Technical Skills:

- ERP Systems : SAP R/3 4. 7, 6.0 S/4 HANA
- Integration System : CPI/HCI, SAP
- Language : ABAP, ABAP-HR, Groovy
- Markup Languages : XML, JSON, XSD, WSDL
- Tools : SOAP UI, Postman
- Operating Systems : Windows XP/2000, Windows VISTA, Windows7.

Experience:

- Worked for N Core Technology Pvt Ltd 09May-2019 to 1 Nov-2021
- Worked for Birla soft from 09Dec-2021 to 12 Oct 2023
- Worked for Mother son Technology from May-2025 to till date

Education Qualifications:

- Graduated from Kakatiya University, Telangana

Professional Experience:

Project #5

Client Name Period: BMW

Period: May 2025 To till Date.

SAP Project: Support & Implementation

SAP Environment: ECC 6.0

Team Size:15

Roles & Responsibilities:

- As a Technical Consultant, I am actively involved in the preparation of detailed technical specifications, and development of objects as per requirements.
- Interacting with the functional team to resolve the issues in the given objects.
- Follow procedures as defined by customer standards.
- Responsible of preparing the End user use case document.

Contributions:

- Developed a report program for displaying Employee salary from RT cluster table using function modules CU_READ_RGDIR, CD_READ_LAST, PYXX_READ_PAYROLL_RESULT.
- Uploaded data into infotypes 0105 and using function module HR_INFOTYPE_OPERATION.
- Enhanced infotype 6 for address details
- Worked on Time cluster tables using function module HR_TIME_RESULTS_GET.
- Created a Custom Infotype and Uploaded Data using BDC.
- Worked on User exits, validation and default ZXPAD01& ZXPAD02
- Worked on various tickets for small-small routine changes of HR development.
- Worked extensively with FTP, SFTP, Mail, and IDoc adapters in SAP CPI / SAP BTP Integration Suite, enabling secure and reliable integration between cloud and on-premises systems.
- Involved in integration Design, Development, Configuration, Deployment and Documentation.
- Used Groovy scripting, utilizing graphical mappings, message mappings, and advanced node functions to handle complex data transformations, validations, and dynamic processing.
- Implemented Cloud-to-Cloud and Cloud-to-On-Premise integration scenarios using SAP Cloud Connector, ensuring secure connectivity, system mapping, and data synchronization across SAP and non-SAP applications.
- Performed in connecting and transfer files with SFTP servers.
- Prepared Integration requirement document, data mapping document for every interface by understanding the functional requirements.
- Delivered technical solutions and collaborated effectively with offshore teams to ensure seamless implementation.

Project #4

Client Name: Reliance industries

Period: June-2022 to SEP2023

SAP Project: Jio & Retail (Support & Implementation)

SAP Environment: ECC 6.0

Team Size:15

Roles & Responsibilities:

- Interacting with the functional team to resolve the issues in the given objects.
- Follow procedures as defined by customer standards.
- Responsible for preparing the End user use case document.

Contributions:

- Created BDC program that will upload Employee's data using Info types 0000, 0001, 0002, 0006, 0021, and. 0022 using SESSION.
- Uploaded data into infotypes 0105 and using function module HR_INFOTYPE_OPERATION.
- Enhanced standard infotype 006 for address details
- Worked on various tickets for small-small routine changes of HR development.
- Delivered technical solutions and collaborated effectively with offshore teams for seamless integration delivery.
- Implemented Cloud-to-Cloud and Cloud-to-On-Premises integrations in SAP CPI, handling scenarios involving File, SOAP, SFTP, IDoc, OData, FTP, and Mail adapters.
- Built integration flows using Graphical Mapping, and Groovy scripts, leveraging all node functions for complex transformations and dynamic processing.
- Provided L2/L3 production support, resolving CPI interface issues and ensuring minimal downtime.
- Delivered hyper care support during the project warranty phase, identifying and resolving post-deployment issues to ensure system stability and client satisfaction.
- Designed and delivered technical integration solutions in SAP CPI while collaborating effectively with onsite and offshore teams to achieve successful project outcomes.
- Supported end-to-end integration lifecycles, including design, development, configuration, deployment, and documentation of iFlows.

Project #3

Client Name : GACL

Period : From December-2021 to May22

SAP Project : support

SAP Environment: ECC 6.0

Team Size: 15

Roles & Responsibilities:

- Interacting with the functional team to resolve the issues in the given objects.

- Follow procedures as defined by customer standards.
- Responsible for preparing the End user use case document. Contributions:
- Developed various Inbound interface programs to get the data from Application server and uploaded data various infotypes.
- Created Custom infotype creation for Work permit details of employees
- Developed various reports to get the payroll data which includes PF details and tax details
- Enhanced infotype 6 for address details
- Worked on various tickets for small-small routine changes of HR development.
- Monitored job statuses and actively supported technical teams during patching and maintenance activities in production systems.
- Managed enhancement and defect fixes, performing testing and moving changes to production as per release schedules.
- Handled all types of tickets (P2/P3/P4) and ensured timely resolution.
- Collaborated closely with functional teams for testing, bug fixes, and validation of existing integration designs.
- Designed and developed interfaces, including interface test routines, design verification, and functional testing.
- Monitored business processes and message flows in real-time, performing analysis, status tracking, and issue resolution as needed.
- Managed transportation of objects across system landscapes (DEV → QAS → PRD) following standard change and release management practices.

Project #2

Client Name : Honeywell Middle East Implementation

Period : From Nov 2019 to Nov 2021.

SAP Project : support

SAP Environment : ECC 6.0

Team Size : 15

Roles & Responsibilities:

- Interacting with the functional team to resolve the issues in the given objects.
- Follow procedures as defined by customer standards.
- Responsible for preparing the End user use case document.

Contributions:

- Developed a report to display payroll results from RT and BT cluster tables using FM CU_READ_RGDIR, CD_READ_LAST and PYXX_READ_PAYROLL_RESULT.
- Developed Bank file outbound Flat File program of clients to send their employee's salary details to Bank Interface Systems.
- Developed a report to display data from 0, 1, 2, 6, 7, 8, 9 Infotypes according to the client requirement.
- Developed a Script for an Employee addresses as labels on A4 size layout.
- Uploaded absence Quota details to 2006.

- Developed reports to display the data by using LDB's.
- Uploaded data into infotypes 0002 and 0008 using function module 'HR_INFOTYPE_OPERATION'.
- Developed an interface program to upload the off-cycle payment details into infotype 0267 by using FM HR_INFOTYPE_OPERATION.

PROJECT #1

Client Name: Apollo Hospitals

Period : Oct2018 to Oct2019

SAP Project : Implement

SAP Environment: ECC 6.0

Team size 15

Roles & Responsibilities:

- This is an implementation project, where my contribution involves the development activities in areas of some functional modules. The primary responsibilities included:
- Understanding the client requirement by reading the Technical Specification received from Development Team Leader.
- ABAP coding.
- Responsible of Unit Testing.
- Responsible of preparing the unit test document.
- Responsible of preparing the End user document.
-

Contributions:

- Developed an interface program to upload the data for Info type 0006.
- Developed an ALV report for displaying the employee basic salary information with pay scale details.
- Developed an outbound interface program with generating the payroll results components.
- Developed an outbound interface program to generate all employees bank transferred amount from payroll results BT table.
- Developed a Smart Form that prints purchase order detail data based on company code and purchase order no with respective subtotals and grand totals.
- Helping the functional consultants by doing the debugging of SAP programs/applications.
