Mobile no: 9392321797

Professional Summary:

- SAP ABAP Consultant with 5+ years of experience in ABAP programming.
- Technical experience in various areas of ABAP namely **DDIC, IDoc, Reports, Module pool, Sap Script, BAPIs, BDC, User Exits/BADIs**/ Enhancements, S4 Hana.
- Experience in SAP Business Intelligence, HANA, Native HANA Business Objects, this includes good exposure to Implementation, Development and Support.
- Working as an analytics expert in various BI proposals which include comparison study of different ETL tools fitment, BI effort estimation followed by bidding and sale.
- Experienced in SAP BW for HANA and migrating standard SAP Models to In-memory optimized models and Performance testing.
- Native HANA MODELLING - Designing Views (Attribute View, Analytic View, and Calculation View), Stacked Calculation Views, Views that needs multiple table functions, counters, Restricted and Calculated measures, input parameters, filters, transparent filters. Debugging Views. HANA Modeling using SQL Script and CESQL scripting.
- Extensively worked on code optimizing and performance tuning.
- Hands on experience with ABAP Objects [**ABAP OOPS**].
- Excellent trouble shooting and debugging skills.
- Highly efficient in understanding client's requirements and converting them into system developments.
- Good understanding of SD, MM, FICO business process.
- Good team player with excellent Functional, analytical and Inter personnel skills.
- Having end to end knowledge on Adapters like File, IDOC, RFC.
- Implemented End to End ALE/IDoc's configurations Provide production support and maintenance. Experience in working upgrade, roll out project.
- Analyze business requirements from functional requirements and translate it to technical design. Extensively worked in Debugging of SAP standard Programs. Experience in working with a large team size and within timeline and quality standards.
- Hands on Experience in OOPS Concepts Like Inheritance, Abstract Class, Interface.

Professional Experiences:

- Worked with **SONY** SAP ABAP TECHNICAL CONSULTANT from Nov 2023 to Till Now.
- Worked with **TCS** SAP ABAP CONSULTANT in May 2022 to Feb 2023.
- Worked with **HP** Associate in July 2019 to March 2022.

SAP Skills:

- Reports, Enhancements.
- Worked on Web services
- Experienced with Debugging Techniques.
- Functional understating to Knowledge in FICO, SD, MM.
- Good knowledge on ALE- IDOC'S
- Worked on Table Maintenance Generator Events.
- Extensively worked on various enhancement Techniques.
- Good Work experience on development, maintenance and have Client Interaction skills.

Project Details:

Project : X4V

Client : SONY

Duration : Nov 2023 – Till Now

Designation : SAP Senior Consultant

Project : Implementation

SAP Environment: SAP ECC 6.0, HANA DB

 Roles and Responsibilities:

- As a team member involved in all phases of implementation from development of business blue print to end-user training.
- Customization of FI organization structure like chart of accounts, posting period variant, field status variant, and account groups. Document types, number ranges.
- Defined Operational Chart of Accounts for the local reporting structure and Group Chart of Accounts for the Group reporting purpose
- Interfacing with Azure technical teams or Microsoft support for cross-platform issues, ensuring effective communication to resolve complex problems.
- Created an ODATA service through SEGW- Tcode for planned and production order.
- Created a different CDS views for Stock movement, Stock transfers, Stock adjustments and stock consumption interfaces and created all the stock interfaces as a single ODATA project in SEGW within a single service.
- Define Chart of depreciation, account determination, screen layout rules, asset classes, Assignment of accounts for automatic postings.
- Collaborating on scenarios that integrate SAP data with Microsoft 365 tools, such as using Excel to access OData feeds or integrating with Microsoft Teams via bots or Logic Apps.
- Developed AMDP's to fetch accounting details.
- Developed a program to trigger proxy and send E-Invoice to golden tax system which is specific to china using proxy.
- Developed Update function module to update/modify the data in custom tables at the time of PO creation.
- Enhancement to populate storage location automatically for replacement order in advance return management process Developed a program to display imbalances which helps to identify the documents at month end activities.
- Developed a program to check the TR dependency Implemented Data tiering technique (NSE) to save in-memory to handle data growth Identified the existing reports which were running long time and fixed with code changes as per coding standards.
- Finding root cause by debugging the production issues. Automated the SD and MM process using UFT tool which helped the team to save testing efforts compared to manual testing. Doing the Code review Implemented data tiering technique (i.e; NSE) which helps to optimize the RAM.
- Finding the root cause by debugging the issues Involved in adjusting the modifications in SPDD and SPAU phase in system upgrade.
- Uploading master data using Legacy System Migration Workbench (LSMW).

Project: SSS.

Client: TCS.

Object: Developed ALV Reports, RFC, BDC, Module pool, Tables, BAPI.

Technical: RFC, BDC, Module pool, ODATA, BAPI, ALV.

Duration: May 2022 to Feb 2023.

All the phases have been separately implemented for different product/material departments (Clean, Dirty, Dry, Chemical). The applications contain multilevel approval process implemented using SAP workflow, DMS operations according to each level user, SO10 Object remarks, Email sending/receiving for user approval/rejections at different levels.

Roles & Responsibilities:

- Added the new field in the selection screen (Implicit Enhancement).
- Attending the business meeting for new developments, Preparing the Micro documents for the same.
- Co-ordinating with SD and MM module resource to resolve the integration related issues.
- Added the Additional Filed Store number in the Standard ALV (BADI).
- Written re-usable code for all the reports
- In a support project involving SAP ABAP and Microsoft Cloud (Azure), the ABAP consultant's role expands to include maintaining and troubleshooting the integrations and custom development that leverage both platforms.
- Developed AMDP's to fetch accounting details.
- Created an ODATA service through SEGW-Tcode for planned and production order.
- Created a different CDS views for Stock movement, Stock transfers, Stock adjustments and stock consumption interfaces and created all the stock interfaces as a single ODATA project in SEGW within a single service.
- Integration between SMAX, ESB and SAP.
- Added custom logic to user exists in SD related programs Like SAPMV45AZZ.
- Co-ordinating with release management to move the changes as per landscape.
- Co-ordinating with SD and MM module resource to resolve the integration.
- Provided guidance to the users to solve user generated errors as well as against incidents.
- Attended KT sessions & updated knowledge with new issues.

Project: ABCBearings

Client: HP

Object: Created Reports for document posting.

Technical: Script, Reports, IDOC's

Duration: July 2019 to May 2022

Roles & Responsibilities.

- Analyzing the Functional specifications.
- As a team member involved in all phases of implementation from development of business blue print to end-user training.
- Creation of Change request (CR) for required changes.
- Co-ordinating with release management to move the changes as per landscape.
- Co-ordinating with SD and MM module resource to resolve the integration.
- Preparing Technical Design Documents.
- Worked with Functional Consultants to understand the requirement of different CR's.
- Prepare Technical specification for the CR's.
- Developed the code based on the Technical Specifications.
- BAPI: BAPI_SALESDOCU_CREATEFROMDATA1 to create Sales Order for the Item Category 'L' (Stock Items).
- BAPI_REQUISITION_GETDETAIL to get the Purchase Requisition Details.
- Code review for the developed objects.
- Technical Unit Testing
- Unit Test Results.

- Objects have been developed in OOP-Object Oriented Programming.

- Worked on ALE-IDOC

Education:

B.Tech 2018
